

Monwar Hossan Himel

Junior Software Engineer | MERN Stack Developer

monwarhossanhimel@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

+8801617721429 | Uttara, Dhaka, Bangladesh

PROFESSIONAL SUMMARY

CSE graduate from **Jahangirnagar University** and Junior Software Engineer with hands-on experience building scalable full-stack web applications using **React, Node.js, Express, and MongoDB**. Strong in designing secure **RESTful APIs**, implementing **JWT-based authentication**, and integrating third-party APIs including **Stripe and Firebase**. Solid foundation in **Data Structures and Algorithms** and Agile-based backend problem solving.

EXPERIENCE

Junior Software Engineer

07/2026 – Present

Software Driven Business IT (Sellxify)

Uttara, Dhaka, Bangladesh

[Appointment Letter](#)

- Develop and maintain full-stack features using React, Node.js, Express, and MongoDB, delivering **12+ core functional components** following Agile SDLC.
- Collaborate with senior engineers during **6+ sprint planning sessions** to translate requirements into production-ready code.
- Own end-to-end implementation of assigned modules, maintaining a **95% task completion rate**.
- Resolve **20+ production bugs and UI glitches**, reducing critical bug turnaround time by **25%**.
- Achieve over **90% compliance** in Code Quality, Bug Optimization, Deadline Compliance, and Team Collaboration KPIs.

Web Development Intern

Dec 2025 – Jan 2026

Hex Softwares Pvt. Ltd.

Remote (WFH)

[Offer Letter](#)

- One-month remote internship applying MERN stack skills to real-world project tasks under an Agile team structure.
- Contributed to front-end and back-end development tasks, gaining exposure to industry workflows and version control practices.
- Strengthened core skills in React.js, Node.js, and REST API integration through guided project work.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, C, C++
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, TanStack Query
- **Backend:** Node.js, Express.js, RESTful API Development
- **Auth & Security:** JWT, Firebase Admin SDK, Role-Based Access Control (RBAC)
- **Databases:** MongoDB, Mongoose, MySQL (Basic)
- **System Design & DSA:** Data Structures, Algorithms, API Design, Pagination, Indexing
- **DevOps & Workflow:** CI/CD Pipelines, Agile SDLC, Git-based Collaboration
- **Integrations:** Stripe API, Firebase Auth, Google Maps API, Cloudinary, ImgBB
- **Tools:** Git, GitHub, Postman, Thunder Client, Cursor (AI-Assisted Development)

PROJECT EXPERIENCE

1. ContestHub – Creative Contest Management Platform

Dec 2025

[Live](#) | [GitHub Client](#) | [GitHub Server](#)

Overview: Production-grade contest management platform enabling creators to host contests, participants to compete securely, and admins to manage approvals and moderation.

- **Tech Stack:** React, Tailwind CSS, Headless UI, TanStack Query, React Hook Form, Framer Motion, Node.js, Express.js, MongoDB, Firebase Auth, JWT, Stripe.
- Built a full RBAC system with three roles – Admin, Contest Creator, Normal User – each with a secure, role-specific dashboard supporting 100+ concurrent sessions.
- Integrated Stripe payments with real-time updates via TanStack Query caching, reducing redundant API calls by ~30%.
- Designed a global leaderboard and role-specific analytics dashboards across 500+ contest records.
- Built a Creator Request workflow letting Normal Users apply for Contest Creator access, reviewed by Admins.
- Implemented full contest lifecycle management with search and category-based discovery.
- Optimized backend using MongoDB indexing and pagination, cutting query response time by ~40%.

2. AI Model Inventory Manager
Nov 2025

[Live](#) | [GitHub Client](#) | [GitHub Server](#)

Overview: Role-based AI model marketplace for uploading, publishing, purchasing, and tracking AI models, with admin review before public availability.

- **Tech Stack:** React, Node.js, Express.js, MongoDB, Firebase Authentication, JWT.
- Built a role-based inventory system supporting uploads, admin approvals, and controlled visibility across 100+ listed models.
- Secured backend APIs using Firebase Auth and JWT verification across 15+ RESTful endpoints.
- Implemented purchase tracking and popularity analytics, cutting manual admin review time by ~25%.

3. Learning Books – E-Book Management System
Jan 2026

[Live](#) | [GitHub Client](#) | [GitHub Server](#)

Overview: Full-stack CRUD-based learning platform for authenticated users to manage digital books via secure backend operations.

- **Tech Stack:** Next.js, Node.js, Express.js, MongoDB.
- Implemented full CRUD functionality for book management, handling 200+ records.
- Designed REST APIs with ObjectId validation, reducing invalid request errors by ~20%.
- Built dynamic listing/detail pages using Next.js routing with server-side rendering.

EDUCATION

M.Sc. in Computer Science and Engineering (Ongoing) Jahangirnagar University	Savar, Dhaka-1342
B.Sc. in Computer Science and Engineering Jahangirnagar University	Savar, Dhaka-1342

CERTIFICATIONS

MERN Stack Development – Programming Hero	Link
Prompt Engineering – AI Academy Bangladesh	Link
Python Django Fullstack Development – Bongodev	Link

LANGUAGES

Languages: Bangla (Native), English (Professional Working Proficiency), Hindi (Spoken Proficiency)
